220 Dickinson St, Suite B - San Diego, CA 92103

* All information collected during the study is kept strictly confidential. Not all individuals are eligible to participate. This is an HNRP-CMCR study. When you call you will review the HNRP-CMCR general screen consent as well as the consent for this study, which contain additional details about participating.

I'm trying a potential new treatment option for my chronic HBV infection.

Who's with me?

Infection with hepatitis B virus, especially chronic infection, is a significant global health problem. The B-Well study is testing a drug, called bepirovirsen, as a potential new treatment. This study is part of the effort to develop treatments that may be more effective than current treatments and may lead to results that continue after treatment ends. B-Well is a phase 3 study.

You may be eligible to participate in this study if you:

- Are at least 18 years old (the minimum age may be higher in some countries)
- Have had diagnosed chronic hepatitis B virus infection for at least 6 months
- Have been on stable nucleoside/nucleotide analogue (NA) treatment (sometimes referred to as antivirals, such as tenofovir or entecavir) for the past 6 months

You will also need to meet additional requirements. The study doctor will review these with you.

Being in this study is your choice and voluntary. If you join the study, you can stop at any time. Your choice will not affect medical care you may receive outside the study. **Your safety and privacy will be our top priorities.**

Living with Osteoarthritis Pain of the Knee?

A CLINICAL RESEARCH STUDY is currently evaluating an investigational drug for the treatment of moderate to severe osteoarthritis of the knee.

- Are you an adult aged 18 years or older?
- Have you been diagnosed with osteoarthritis in your knee?
- Have you had persistent knee pain for at least 12 weeks (about 3 months) that does not improve with current treatment?

If you answered yes to these questions, you may be eligible to participate in this study.

Call us today to learn more.
